> Art. **AA76** sz. foro rubinetto / without tap hole / sans trou pour robinet

**Cristalplant\*** è conosciuto per la superficie simile alla pietra naturale dall'effetto soft touch. È un materiale composto per la maggior parte da cariche minerali di triidrati di alluminio di elevata purezza, legati da resine di origine vegetale.

È un materiale omogeneo in tutto il suo spessore e può essere riparato da graffi, macchie ostinate e bruciature di sigaretta, riportando la superficie alla bellezza originale.

Per la pulizia è sufficiente acqua saponata o comuni detersivi, così da rimuovere la maggior parte delle macchie e dello sporco che si possono depositare sulla superficie. Per mantenere la caratteristica finitura opaca, utilizzare in fase di pulizia una spugna abrasiva e detersivi in gel o abrasivi, avendo cura di risciacquare subito la superficie.

**Cristalplant\*** is known for its natural stone-like surface with a soft touch effect. It is a composite material primarily made of high-purity aluminum trihydrate mineral fillers, bound by plant-based resins.

Is a homogeneous material throughout its thickness and can be repaired from scratches, stubborn stains, and cigarette burns, restoring the surface to its original beauty.

For cleaning, soapy water or common detergents are sufficient to remove most stains and dirt that may settle on the surface. To maintain the characteristic matte finish, use an abrasive sponge and gel or abrasive cleaners during the cleaning process, taking care to rinse the surface immediately.

**Cristalplant\*** est connu pour sa surface semblable à la pierre naturelle avec un effet soft touch. C'est un matériau composé en grande partie de charges minérales de trihydrates d'aluminium de haute pureté, liés par des résines d'origine végétale.

Est un matériau homogène dans toute son épaisseur et peut être réparé des rayures, des taches tenaces et des brûlures de cigarette, restaurant la surface à sa beauté originale.

Pour le nettoyage, il suffit d'eau savonneuse ou de détergents courants, afin d'éliminer la majorité des taches et de la saleté qui peuvent se déposer sur la surface. Pour maintenir la finition mate caractéristique, utiliser lors du nettoyage une éponge abrasive et des détergents en gel ou abrasifs, en veillant à rincer immédiatement la surface.
